Reduce server response time

In our test, your server responded in 0.56 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 7 blocking script resources and 9 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <https://deep-fryers.org/wp-includes/js/jquery/jquery.js>
- <https://deep-fryers.org/wp-includes/js/jquery/jquery-migrate.min.js>
- <https://deep-fryers.org/wp-includes/js/comment-reply.min.js>
- <https://deep-fryers.org/wp-content/themes/hestia/assets/bootstrap/js/bootstrap.min.js>
- <https://deep-fryers.org/wp-includes/js/jquery/ui/core.min.js>
- <https://deep-fryers.org/wp-content/themes/hestia/assets/js/script.min.js>
- <https://deep-fryers.org/wp-includes/js/wp-embed.min.js>

[Optimize CSS Delivery](#) of the following:

- <https://deep-fryers.org/wp-content/plugins/yet-another-related-posts-plugin/style/widget.css>

- <https://fonts.googleapis.com/css?family=Roboto%3A300%2C400%2C500%2C700%7CRoboto+Slab%3A400%2C700&subset=latin%2Clatin-ext&ver=2.5.6>
- <https://deep-fryers.org/wp-content/plugins/yet-another-related-posts-plugin/style/related.css>

Consider Fixing:

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 45% of the final above-the-fold content could be rendered with the full HTML response.
- [Click to see the screenshot with only the HTML response: snapshot:17](#)

5 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

Mobile

Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).

Desktop

76 / 100 Speed

! Should Fix:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.
