68 / 100 Speed

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking script resources and 16 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://thegulfjobs.net/wp-content/themes/sahifa/fonts/BebasNeue/BebasNeue-webfont.woff> (expiration not specified)

Mobile

- <https://www.googletagmanager.com/gtag/js?id=UA-106203884-3> (15 minutes)

- <https://www.googletagservices.com/activeview/js/current/osd.js?cb=%2Fr20100101> (50 minutes)
- https://www.googletagservices.com/activeview/js/current/osd_listener.js?cache=r20110914 (50 minutes)
- <https://pagead2.googlesyndication.com/pagead/js/adsbygoogle.js> (60 minutes)
- <https://www.google-analytics.com/analytics.js> (2 hours)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 1.4KiB (16% reduction).

- Minifying <https://thegulfjobs.net/wp-content/plugins/instanow/assets/style.css> could save 801B (16% reduction) after compression.
- Minifying <https://thegulfjobs.net/wp-content/plugins/taqyeem/style.css> could save 324B (20% reduction) after compression.
- Minifying <https://thegulfjobs.net/wp-content/plugins/taqyeem-buttons/assets/style.css> could save 183B (17% reduction) after compression.
- Minifying <https://thegulfjobs.net/wp-content/themes/sahifa/css/ilightbox/dark-skin/skin.css> could save 145B (11% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 899B (21% reduction).

Mobile

- Minifying <https://thegulfjobs.net/wp-content/themes/sahifa/js/search.js> could save 706B (20% reduction) after compression.
- Minifying <https://thegulfjobs.net/wp-content/plugins/taqyeem/js/tie.js> could save 193B (23% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 32KiB (25% reduction).

- Compressing <https://thegulfjobs.net/wp-content/uploads/2019/09/Emirates-airlines-310x165.jpg> could save 8.2KiB (40% reduction).
- Compressing <https://thegulfjobs.net/wp-content/uploads/2019/10/eTIHAD-FEATURED-310x165.jpg> could save 7.8KiB (45% reduction).
- Compressing <https://thegulfjobs.net/wp-content/uploads/2019/10/Millennium-Hotel-jobs-310x165.png> could save 5.3KiB (14% reduction).
- Compressing <https://thegulfjobs.net/wp-content/uploads/2019/10/RTA-HOTEL-Jobs-310x165.png> could save 4.4KiB (20% reduction).
- Compressing https://tpc.googlesyndication.com/daca_images/simgad/5297785594088401333 could save 3.6KiB (22% reduction).
- Compressing <https://thegulfjobs.net/wp-content/uploads/2019/10/AL-NAHIYA-Group-Jobs-310x165.png> could save 2.6KiB (19% reduction).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

96 / 100 User Experience

Consider Fixing:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 415 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the

Mobile

viewport.

- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.
- The element `<div class="mini-share-post">Share...Pinterest</div>` falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `»` is close to 1 other tap targets.
- The tap target `<div id="topcontrol" class="fa fa-angle-up">` is close to 1 other tap targets.
- The tap target `<div id="topcontrol" class="fa fa-angle-up">` is close to 1 other tap targets.
